

About

I'm a UI/UX product designer with hands-on frontend skills, working mainly on B2B systems and data-dense interfaces. My work spans clarifying business rules, restructuring information architecture, and building both the high-fidelity UI and the frontend that ships it. I split complex business logic into structure and parameters, so rule changes don't require re-touching the system. On the handoff side, I build on a CTI token architecture, with file naming and component boundaries that map directly onto the frontend's CSS/Sass.

Experience

Product Designer (Project-based)

Spotx Studio
Since 2022

B2B Systems & Complex Workflow Design

- Layered permission and rule-configuration architecture (RBAC-inspired), clarifying financial logic and approval workflows
- Moved eligibility checks upstream in the flow, cutting invalid actions and manual cross-checking
- High-density data visualization, prioritizing information for high-pressure, low-attention contexts

Frontend Development & Technical Integration

- Independently built the frontend from design files through to the live product, currently supporting operations across 15 care facilities
- HTML5, CSS3 / Sass, Bootstrap, jQuery, Responsive Web Design (RWD)
- IoT / hardware-control interface logic, including device pairing and real-time state sync

Design System & Developer Handoff

- Independently managed and built semantic tokens, boolean variables, RWD breakpoint rules, and a component library
- Delivered specs and annotated assets whose naming and structure map to frontend CSS/Sass logic
- Unified visual language and component behaviour across iOS and Android

Usability Research & Testing

- Tree testing, task-based testing, moderated usability testing
- Designed quantitative metrics: completion rate, TTFV (time-to-first-value), SUS

Media Team Lead

TCOC
Since 2023

Implemented project operations system

Used Notion to build a standardized agile project workflow, eliminating cross-departmental information silos and markedly improving team collaboration transparency and on-time delivery.

Led brand refresh & multimedia production

Directed the official website redesign and visual iteration, and led the team through high-spec in-depth interviews and event documentary videos — from script and storyboard through to filming and edit.

Visual Designer

In-well Limited
2021 - 2022

High-Conversion Marketing

Drove sales performance by translating marketing strategies into high-conversion ad creatives. Transformed complex product data into easily digestible visual charts to facilitate consumer decision-making.

Education

Bachelor in Hotel Management

The Hong Kong Polytechnic University
2016-2020

Internship: Executive Floor Front Desk, Sunworld Dynasty Hotel Taipei (6 months)

Skills	UI/UX Design	Figma, Information Architecture, User Flow Design, cross-departmental permission mapping (RBAC), high-density data interfaces, high-fidelity prototyping	   
	Frontend Integration	HTML5, CSS3 / Sass, Tailwind CSS, Bootstrap, Responsive Web Design (RWD), jQuery	     
	DesignOps & Tools	Design system architecture, Notion project management, AI workflows (Claude, Gemini, MAKE), Rive, Lottie
