

About

A Product Designer with a frontend engineering mindset (HTML/CSS/JS), acting as a strategic bridge between design, business, and engineering teams. Expertise in transforming complex business requirements into scalable B2B solutions and Design Systems. Proven track record in optimizing data visualization logic and streamlining developer handoff to significantly reduce technical debt and accelerate product delivery.

Experience

Product Designer (Project-based)

Spotx Studio
Since 2022

B2B & SaaS System Optimization

Significantly reduced operational errors for admin staff by reshaping Information Architecture and untangling complex permission logic.

Establish Scalable Design System

Improved design-to-dev efficiency and visual consistency by establishing standardized design specifications using Figma Auto Layout and Variables.

Optimized Developer Handoff

Reduce engineering communication costs by Pre-defined RWD rules and interaction states that align with CSS logic.

End-to-End Product Design

Executing the full design lifecycle, from user interviews and requirements to high-fidelity prototyping and usability testing.

Media Team Lead

TCOC
Since 2023

Implemented Project Management Systems

Improved transparency and on-time delivery by implementing Notion workspaces to standardize workflows and eliminate information gaps.

Lead Website Redesign

Led the official website redesign, managing visual direction and UI iterations. Oversaw the quality control of cross-media visual assets.

Lead Interview Video Production

Delivered high-quality content for in-depth interviews and events by directing the end-to-end video production process from scripting to editing.

Visual Designer

In-well Limited
2021 - 2022

High-Conversion Marketing Design

Drove sales performance by translating marketing strategies into high-conversion ad creatives and product visuals.

Education

酒店管理學士學位

The Hong Kong Polytechnic University
2016-2020

Internship: Executive Floor Front Desk, Sunworld Dynasty Hotel Taipei (6 months)

Skills

UI/UX Design

Figma (Advanced), Information Architecture (IA), User Flow, Wireframing, High-fidelity Prototyping, User Analysis.

Frontend Integration

HTML5, CSS3 (Sass), Bootstrap, Responsive Web Design (RWD), jQuery, Motion Design (Lottie/Rive).

Tools & Management

Notion
